

Backgrounder

Our Service

Jarvey connects multiple people going in the same direction with a driver who can carry them. We augment the public transport network with an on-demand service that helps to get Barbados moving while reducing the number of single-occupancy vehicles on the road. Taking a ride with us is simple!

1. Send request from your phone

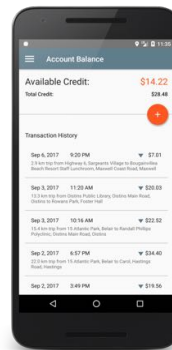

Clients request a ride in the app. We match them with others heading the same way, and find a driver to do the trip.

2. Board your WiFi-enabled Jarvey

Our drivers pick up clients in their own air-conditioned, WiFi-enabled vehicles. They serve multiple clients along the way.

3. We bill your pre-paid account

Clients pay for ride-matching and for the driver's route guidance. We debit their topped up, pre-paid account, just like a cell phone.

We Believe

Transportation should be smart, sustainable, affordable, and so simple it's unremarkable. We create smart solutions by encouraging boundless imagination brought to life through broad collaboration and deep analysis. We challenge all ideas, including our own, and we never forget that our clients guide everything that we do.

The Details

► Is this legal?

We have spoken with Licensing Officers at the Barbados Licensing Authority who have stated that private vehicle operators can legally offer transportation for hire to members of a closed group. Our lawyers concur and our binding Terms of Use for both drivers and clients clearly stipulate that Jarvey is a members-only service and we do not serve the general public.

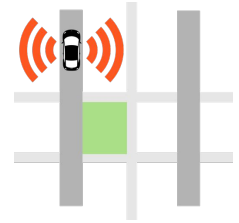

► Are the drivers insured?

Our insurance provider partner will provide a modified private vehicle policy for our member drivers, allowing them to drive for hire as long as they are driving with Jarvey and complying with the Terms of Use. For full transparency, the Terms of Use that clients agree to also outlines this insurance agreement.

► How safe is this?

We personally vet every driver on our platform and inspect their vehicles. Drivers must be over 25 years old, and our insurer also reviews and approves each driver. In addition, each driver's phone has telematics software installed, which records their location, speed, driving habits, and cell phone use while driving. We always know where our drivers are, who is on board, and where they are going.

► Is this just a “Bajan Uber”?

No, it's even better! Jarvey is a ride-sharing platform that groups multiple people travelling in the same direction and matches them to a single vehicle. Clients share the ride and pay a lower fee, which reduces the demand for single-occupancy vehicles. The Uber we're most familiar with is a ride-hailing service that matches one person with one driver—there is no sharing involved.

Who We Are

Antonio Gittens

Co-Founder, Thinker of Deep Thoughts

M.Eng Transportation, University of Toronto, 2014

Antonio has been a Transportation Planner with IBI Group in Toronto since 2014, working on several transportation projects across Ontario. Before that, he was a solution consultant in the tech sector. Antonio came up with Jarvey in 2013 and led the 2017 pilot. He will be responsible for strategy and business development.

Co-Founder, Creator of Awesome and Not So Awesome

BSc Computer Science & Accounting, UWI Cavehill, 2010

Ife is an Auditor by profession, but her 5-year marketing and PR history includes proposal development and project execution, including Crop-Over and Old Years' events. She led Jarvey's marketing and client development throughout the 2017 pilot and will continue in this role going forward.

Ife Clarke, CPA

What We Heard

We made hundreds of trips during our 6-month pilot in 2017-2018, and this is what our clients had to say:

Easy to use and definitely a comfortable ride with great customer service!

- Reyna

I love that I can just sit back and zone out on the free WiFi OnBoard.

- Ricardo

You got a good thing going here!

- Sheena

Safe and reliable. I don't have to worry about getting my daughter to school.

- Angela

I like the update texts that let you know when the vehicle will be there.

- Cheryl
